Built by the people who scope it

Suthar Technologies is a Mumbai-based software studio. We build websites, e-commerce stores, mobile apps, custom software (CRM, ERP, billing) and AI chatbots, agents and automation — for local businesses across Mumbai and for companies worldwide.

Suthar Technologies was founded in 2026 by Kunal Suthar, and works with local businesses across Mumbai, Thane and Navi Mumbai (in person) and with companies abroad (remotely, in your time zone).

Scope it honestly

We push back early and will tell you to build less — or nothing — when that is the right answer.

No handoffs

The person who scopes your project is the person who builds it. No account-manager layer.

You own everything

Code, data, domain and accounts are in your name. No lock-in, no hostage hosting.

Measure the outcome

We care about the calls, orders and hours saved after launch — not just the handover.

How a project runs

01. Free call

A 20-minute call or WhatsApp chat about what you need. We tell you honestly what will work — and what will not.

02. Fixed proposal

Clear scope, timeline and price in writing. Larger projects start with a short paid discovery.

03. Design

You approve something you can click — a design or prototype — before the build starts.

04. Build & demo

Short sprints with a live preview link. You see progress every few days, not after months of silence.

05. Launch & care

Testing, launch, training and handover of everything. Optional care plans keep it running and improving.

What you get with every project

- A written scope and a fixed quote before any work starts
- A live preview link while we build
- Mobile-first, fast, SEO-ready delivery
- Domain, hosting and accounts in your name; full source code at handover
- Training for your team and a support period after launch

Services

Pick what you need, or let us recommend it. Every project gets a free, fixed quote in writing.

Website Development

Fast, SEO-ready business websites that turn visitors into calls, WhatsApp chats and enquiries.

- Business websites
- Landing pages
- CMS & blogs
- Bookings & enquiries
- Local SEO setup

E-commerce Development

Online stores on Shopify, WooCommerce or a custom stack — payments, shipping and WhatsApp order updates included.

- Shopify stores
- WooCommerce & custom
- Payments & shipping
- WhatsApp commerce
- Inventory & ERP sync

Mobile App Development

Android and iOS apps from one Flutter or React Native codebase — bookings, delivery, loyalty and internal tools.

- Customer apps
- Delivery & service apps
- Internal & field apps
- Admin dashboards
- Payments & notifications

Custom Software

CRM, ERP, billing, inventory and internal tools built around how your business actually runs.

- CRM & sales systems
- ERP, billing & inventory
- Internal tools & dashboards
- Integrations
- Customer & dealer portals

AI Agents & Chatbots

AI chatbots, WhatsApp assistants and agents that answer customers, qualify leads and do repetitive work 24×7.

- Website AI chatbots
- WhatsApp AI assistants
- AI agents
- RAG knowledge systems
- Voice agents

Automation & Integrations

n8n, Make and custom automations that remove copy-paste work — leads, invoices, reports and follow-ups on autopilot.

- Lead automation
- Workflow automation
- Payment & invoice follow-ups
- Reports on autopilot
- Document processing

SaaS & MVP Development

Startup MVPs, SaaS platforms and customer portals with real auth, billing and dashboards.

- MVP builds
- SaaS platforms
- Customer portals
- APIs & integrations
- AI features

Ready-made templates, customised for you

23 templates for clinics, restaurants, real estate, stores, apps, WhatsApp AI and automation. We customise them with your brand, content and WhatsApp. Live demos show fictional businesses so you can try them yourself.
